Interactive Dashboard & KPI Visualizations

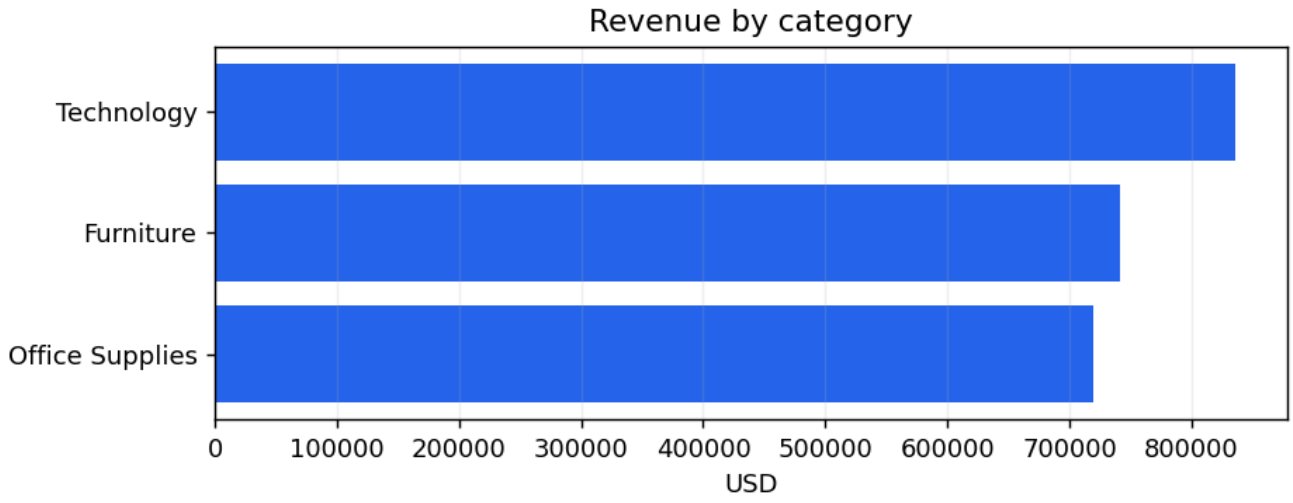

Executive KPI report | Sample Superstore educational dataset

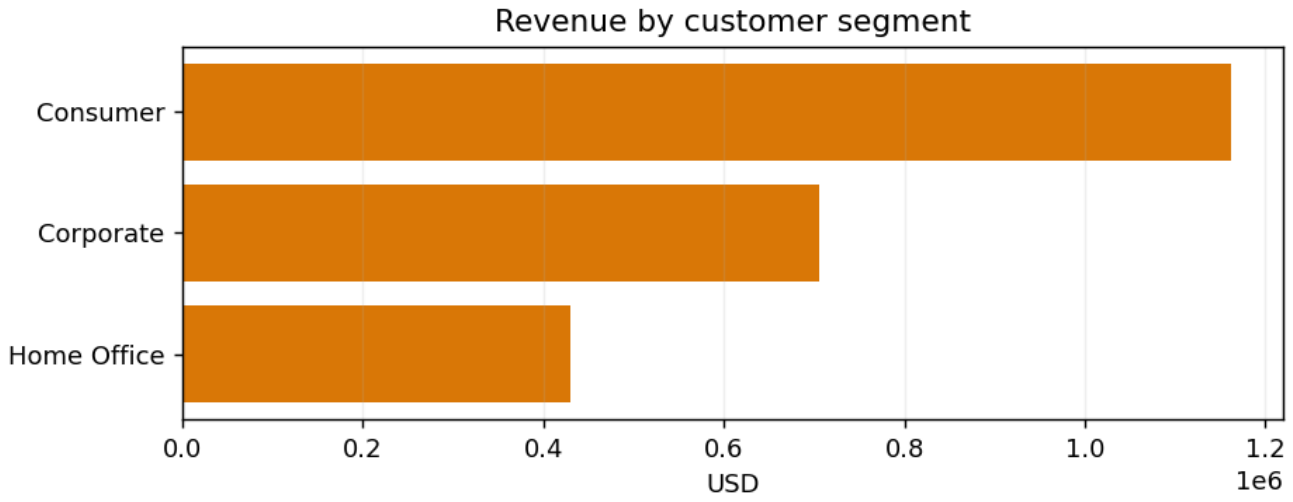

Dataset: 9,994 validated order-line records · 2015-01-03 to 2018-12-30 · US-only

KPI	Value	Calculation / status
Total revenue	$2,297,200.86	Sum of source Sales
AOV	$458.61	Revenue / unique orders
Total orders	5,009	Distinct Order ID
Unique customers	793	Distinct Customer ID
Average discount	15.6%	Mean line-item discount
CAC	Unavailable	No acquisition spend / new-customer flag
Churn	Unavailable	No defined active-customer status history

Observations & recommendations

Revenue totals $2,297,200.86 across 5,009 orders and 793 customers. AOV is $458.61.

Technology leads category revenue ($836,154.03); Consumer leads segment revenue; West leads regional revenue ($725,457.82). Consider comparing contribution margin as well as gross sales when planning category and regional investment.

Acquisition cost and churn cannot be established from this file. Capture marketing spend, acquisition cohort/new-customer indicator, and customer activity/retention definitions before making CAC or churn decisions. Sales channel is also absent. This is fictional sample data; observations are descriptive and not causal.
